

Rugged Tablet Computer

Slim, Rugged, Multi-functional Wireless Computing

Highton tablet is a reliable, rugged, mobile computer designed for ease of use and high performance in the field. This is the tablet for those mobile workers who need a computer they can count on no matter where the job takes them, or how long they have to stay in the field to get the job done.

Mobile workers who require large screens for forms and documents have the advantage with a capacitive multitouch display that is for finger, glove-sensitive, or can be customized for stylus performance.

DESIGNED FOR TOUGH WORK REQUIREMENTS

Highton brings together a fully-rugged enclosure, and a host of options. Built fully rugged to IP65 standards for dust and water, and the latest MIL-STD-810G standards for drops, shock, vibration, humidity, rain or dusty conditions, HR841B was created for hard work by hard working professionals, anywhere. With impressive full-color outdoor view-ability even in the brightest sunshine, the 8" WUXGA display is under Corning® Gorilla® Glass and will not be affected by rain. The tablet is also tested against prolonged solar exposure. Designed to last for all-day performance, the HR841 tablet can keep going from shift to shift. Lengthen your work day with charge batteries in the field or office.
